

A message from our Safety for All Team in regards to COVID-19

We know businesses have been hit hard with the mandated closures due to COVID-19. We also know that just because your business is closed does not mean your investment is safe.

Our Safety for All Team has created some helpful tips as reminders of things you can do to help keep your business safe:

- Leave exterior lights and motion lights on.
- Trash cans or trash enclosures should be locked and if possible stored inside a garage or loading area.
- Set alarms and cameras.
- Tell monitoring companies the facility is closed and secure so they should not see activity.
- If you have security patrol be sure they know to check all doors and windows.
- Small planters or decorative items that can be stolen or used to cause damage to property (i.e. thrown through windows) should be removed.
- Vehicles should be locked, and keys and valuables secured inside buildings.
- If you only have a few vehicles it may be good to have them removed to trusted employee homes rather than parked together for days on end.
- Vegetation maintenance schedule should be maintained, Spring brings a lot of quick growth that can cause line of sight issues.
